

Task 2: Log Comparison

 **Time Limit:** 10 minutes

 You will be reminded at **1 minute** remaining. The task will be **cut off at 10 minutes**.

Goal

Determine which player's burger was finished first between **Player495** and **Player493**

What You Can Do

- ✓ You **do not** need to send any new requests — logs have already been generated.
- ✓ You can:
 - Interact with the tool to explore, filter, or reorganize logs
 - Optionally modify the code to assist your investigation (e.g., add timestamps, print markers, etc.) **Make sure you are in the right directory**

```
cd ./please-open-here
```

Please execute the following script when you modify server.js

```
npx babel server.js --out-file ./dist/server.compiled.js
node ./dist/server.compiled.js
```

or

```
npm run start-second-task
```

```
// open other terminal and run
node ./do-not-modify.js
```

Your Task

1. Identify which player's burger was completed first

Use the available logs and any strategies that help you understand the timing and preparation flow for each order.
